

Recipe Box: React Recipe App

Course-end project write-up

A React recipe app built with Vite: a list of recipe cards, a detail page per recipe, an add-recipe form and search. Recipes come from sample data in the project.

How to run

`npm install` then `npm run dev`, open `http://localhost:5173`. Build with `npm run build`.

Project structure

```
src/
  data/      recipes.js
  context/   RecipesContext.jsx, useRecipes.js
  components/ Header, RecipeCard, RecipeDetail, SearchBar
  pages/     RecipeListPage, RecipeDetailPage, AddRecipePage
  utils/     searchRecipes, validateRecipe, storage
```

Tasks completed

Task	What was done
1. Set up the project	Created with <code>npx create-vite</code> (React template), added <code>react-router-dom</code> , initialised a git repository and committed a clean baseline before building features.
2. Basic UI for the recipe	App shell (header, main, footer) and a <code>RecipeCard</code> component showing image, category, title, description, time, servings and difficulty.
3. Sample data	<code>src/data/recipes.js</code> with a defined recipe shape: ingredients, steps, tags, times, servings and difficulty.
4. Display recipes in the UI	<code>RecipeListPage</code> maps the data into a responsive card grid.
5. Add more recipes	Expanded the data to 13 recipes across five categories, and added an Add Recipe form with validation. New recipes are saved in <code>localStorage</code> and appear first in the list.

6. Card format for recipe details	RecipeDetail component: header image, quick-facts tiles, ingredients list, numbered directions and tags, at /recipes/:id. Unknown ids show a "Recipe not found" state.
7. Search	Case-insensitive, multi-word search over title, description, category, cuisine, tags and ingredients. The query is kept in the URL (?search=), with a result count, a no-results state and a Clear button.

DINNER • ITALIAN

Classic Tomato Pasta

A quick weeknight pasta with a simple garlic and tomato sauce.

PREP
10 minCOOK
20 minTOTAL
30 minSERVINGS
4DIFFICULTY
Easy

Ingredients

- 400 g spaghetti
- 2 tbsp olive oil
- 3 cloves garlic, sliced
- 1 can (800 g) crushed tomatoes
- 1 tsp salt
- Fresh basil leaves
- Grated parmesan, to serve

#pasta

#vegetarian

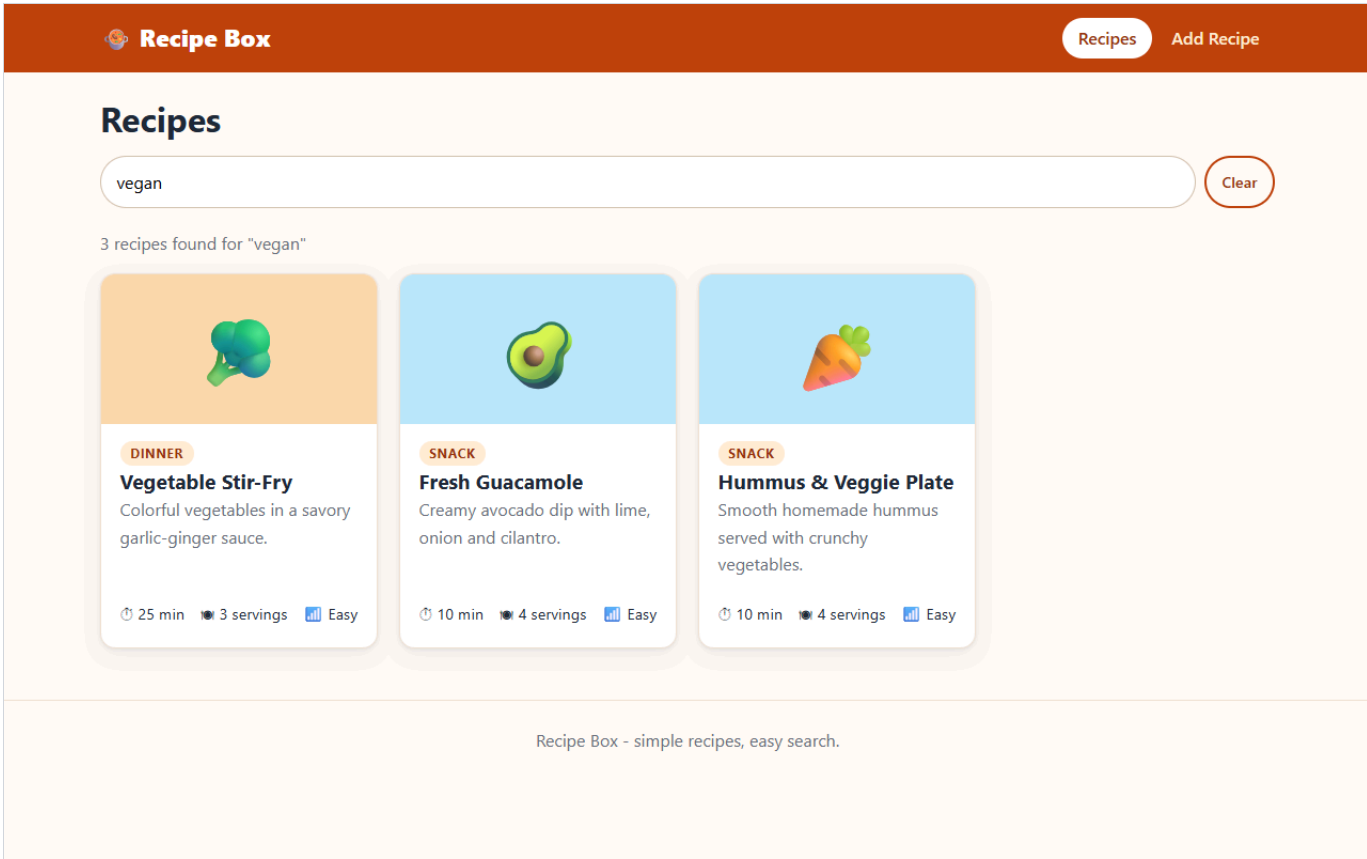

#quick

Directions

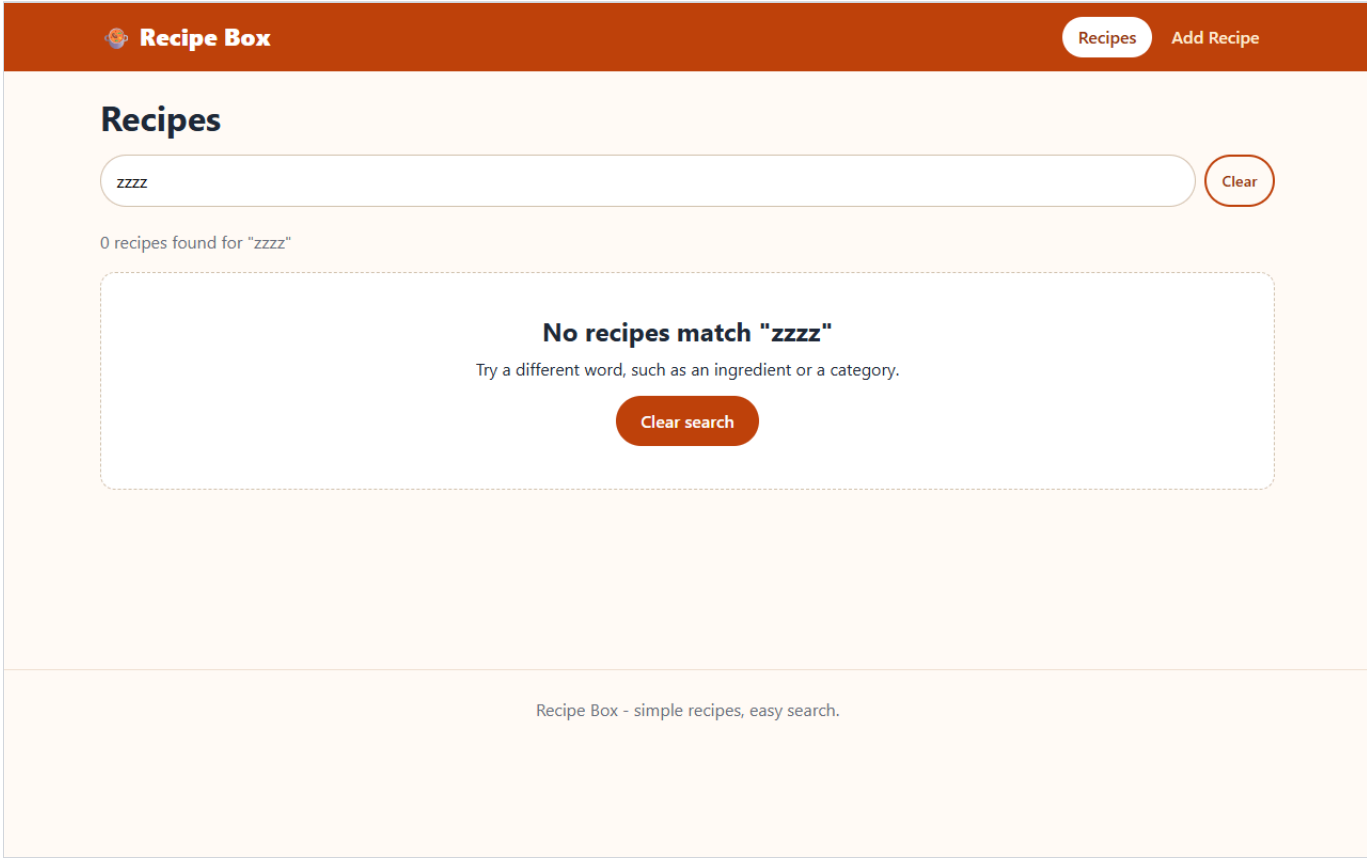

1. Boil the spaghetti in salted water until al dente, then drain.
2. Warm the olive oil in a pan and cook the garlic for 1 minute.
3. Add the tomatoes and salt, then simmer for 15 minutes.
4. Toss the pasta in the sauce, top with basil and parmesan.
